

EWK

New Hygiene Card EWK 413

ERKOTRÜTZSCHLER

New Hygiene Card EWK 413

Technical specifications:

Working Width:	1.0 - 4.5 m
Web Weight:	20 - 120 g/sm
Capacity:	up to 400 kg/h/m

The EWK 413 is the new solution not only for spunlaced products. The Centrifugal Dynamic Web Formation means for the user a broader range of applications by having more flexibility on the web weight produced, although having a better MD/CD orientation than any other card.

An excellent Web Structure and Appearance is achieved through

- Double Side Carding and Circulate Blending, thus resulting in a new generation of product quality.
- Highest Efficiency and Throughputs over 400 kg/h/m for various fibres and grammages contribute ideally to quantity requirements.
- Different Executions are available to suit the needs of the user.
